The *beauty* of hardwood.

Burchette & Burchette
HARDWOOD FLOORS

Our Story

Burchette & Burchette Hardwood Floors is a third generation, family-owned-and-operated business from Elkin, N.C. Since 1948, we have specialized in delivering a high quality product with customer service before, during, and after the sale is complete.

Over the last 60 years, it has been our experience that a person building or remodeling their dream home, aspires for that home to be unique and to feel like home to them. It has always been our endeavor to help our customers create the perfect floor for their home. Wood floors are unique; they each have a history and a personality. It is our purpose to match that personality with your own, and then provide the highest quality, custom milled floor to make your vision a reality.

No single manufacturer can be the best at everything, just like in any industry, most manufacturers specialize in certain fields. We have searched the world over to collect the most extensive, custom milled, quality driven product line available. We refer to this exclusive line as the **'Artisan Collection.'** The Artisan Collection embodies a vast variety of species, grades, widths, thicknesses, length options, surface textures, and finishes. The line is composed of solid and engineered hardwood products, ranging from 2 1/4" up to 10" wide. We offer three grades, designed to minimize waste, and to create a more eco-friendly product. Many of these products are available from manufacturers who are certified by the Forest Stewardship Council, which ensures the proper stewardship of our natural forests. The Artisan Collection also offers a variety of surface textures including numerous hand-scraping techniques, weathered textures, a French Bleed effect, and hand chiseled square pegs. We offer all of our products unfinished, and many of them pre-finished with an array of finishing techniques.

Medallions, borders, inlays, and parquet are all various expressions of art through craftsmanship. There are hundreds of styles available in various designs; however, we can create a unique piece based on your design scheme.

We are dedicated to the use of products that are made using proper forest management practices, as well as the use of products made from sustainable materials such as cork and bamboo.

We also offer matching stair components, wrought iron, air registers, adhesives, waterproofer, wood fillers, and finishes.

To help you with your selection we have provided a virtual showroom at www.burchetteandburchette.com to outline our product line, specifications, detail photographs, and room scenes to help you visualize your future hardwood floor.

We also have a 6,000 sq. ft. showroom in Elkin, N.C. where you will find our home office. There is also a satellite showroom in Greensboro, N.C. as well. We have a highly trained sales staff that will be happy to assist you with your selections. We also provide sampling of products you may be interested in.

Tradition, diligence, morality, personal attention to detail, and our outstanding ability to create a high quality, unique, and consistent product are all the reasons why you should let **Burchette & Burchette** create your custom hardwood floor.

Over 60 years of delivering the best product and the best service – period.

Artisan Collection

The Artisan Collection is an extensive collection of over 50 different species and grades, all custom milled per customer, which were organized to meet all our customers needs, both aesthetically and technically.

We offer widths from 2 1/4" up to 10" wide, and lengths up to 14' long. While these products are based off of a 3/4" solid hardwood, we also have a corresponding 5/8" Engineered products with a 4.8 mm wear layer to create seamless transitions over concrete slabs and radiant heat.

The Artisan Collection also offers a variety of surface textures including numerous hand-scraping techniques, weathered textures, a French Bleed effect, and hand chiseled square pegs. We offer all of our products unfinished, and many of them pre-finished with an array of finishing techniques.

Artisan Collection

French Bleed

A French Bleed accent creates an amazing visual effect, especially on hardwoods that have flat grains such as American Cherry, Maple, and Brazilian Cherry. This finish is much like a glaze on the wood. The colors available are black, mocha, and cinnamon.

This finish effect will add an interesting appeal and unparalleled beauty to your custom hardwood floors.

Square Pegs

Square pegs are a duplication of a technique used by artisans and woodwrights of our past. Prior to round pegs, artisans would chisel square holes in floors and furniture and drive square pegs into place. This is a difficult technique even with today's tools. Square pegs look great paired with a French Bleed accent or with a hand scraped floor.

Hand Scraping

Many believe hand scraping is a 'distressing' that is done to a hardwood floor. However, hand scraping is meant to be the duplication of a process which artisans and finishers used to prepare and finish wood floors prior to modern sanding equipment.

This method allows us to give our customers a floor that resembles the floors finished prior to the 1900's. We offer our hand scraped floors in several techniques. Please inquire about our different options for scraping your custom hardwood floor.

Wire Brushing

Wire brushing is available on hardwoods and softwoods which have an open grain pattern such as Oak, Hickory, Ash, Walnut, and Heart Pine. This technique creates an accent on these open grain patterns. It gives your hardwood floor a texture that, when finished, has depth, rather than the smooth look of a traditional sanded floor. Floors such as the ones listed above naturally wear this way — we are simply speeding the process along 100 years.

** Photo to the right shows example of wire brushing*

☐ Custom Parquet

Parquet is a reflection of craftsmanship that has been

reminiscent of castles, manors, and chateaus throughout Europe for the last 400 years. Many patterns are named based on the significance of where they originated, such as the Louvre, the Marie Antoinette, the Brittany, and the Bordeaux. There are dozens of patterns that have been used over the last 400 years, and there are dozens of new designs created by the artisans of our time. You can find all of these designs in our virtual showroom.

Medallions & Inlays

YAREMA
MARQUETRY

Medallions, borders, and inlays allow a customer's imagination to come to life

with their hardwood floor. There are hundreds of selections that are considered standard, which embodies the various decorating styles, culture, and personality of every home. If your taste lends to something completely original, we can create a unique piece based upon your design scheme. The possibilities are endless, whether in your home, office or place of business. If you can imagine it, we can create it.

▣ *Stair Components*

The stairway of a home is often a dramatic focal point of the design.

Let us help you create an inviting stairway that welcomes everyone that enters your home. We have an extensive collection of various styles, in most every species to coordinate with the many types of flooring. Whether you are looking for a classic box newel, or decorative wrought iron, we have the array of products to meet your unique style.

Air registers are a decorative touch to the hardwood floors, and a great way to jazz up an unattractive air return. Whether you are looking for the subtlety of a flush-mount or drop-in wood vent, or the bold and timeless statement of a cast iron vent mounted in a flush wood frame. We offer wood vents in the following options: baseboard vents, drop-in vents, flush-mount vents. We also offer cast iron drop-in vents, and cast iron flush-mount vents. We can supply these vents in any species and most any size.

☐ Sustainable Sources

We are committed to the proper stewardship of our natural resources, as well as the use of sustainable products. Most all of our products in the Artisan Collection are available from an FSC certified manufacturer. Please specify if you are looking for products that are certified by the Forest Stewardship Council. This process ensures the proper stewardship of our natural resources.

Sustainable products are also available such as cork, bamboo and a hybrid wood tile known as Celenio. These products are constructed with sustainable materials or through the use of recycled products.

How to Order

Ready to order? Have some questions? We're here to help.

Please contact us and speak with one of our knowledgeable sales staff. We can provide you with all the information you will need to know to pick out your hardwood floors, create them, and deliver them to you in a timely fashion.

We have a long history of working with architects, designers, builders and homeowners to deliver the floor that they have envisioned. We understand there are many choices, but we will help you determine the floor that will fit your home and your lifestyle.

Our sales staff can help you determine which floor will fit your application, whether your hardwood will be in a traditional building setting, over radiant heat, or over a concrete slab. We can also provide you with the adhesives, waterproofers, underlayments, finishes, wood filler, and the other necessities of the installation and finishing process.

A custom order, depending on the complexity of what we are providing, generally takes 3–8 weeks to complete. All of our floors are made per customer, per order, and per the specifications.

We can deliver your floor anywhere, but please let us know of any special circumstances that may occur. There are several methods of delivery, mostly by common carrier or by flatbed, which we will arrange for you.

Please consider us when creating your next hardwood floor! Feel free to call us at (336) 835-6409 or email us at info@burchetteandburchette.com.
